

RESEARCH PROFESSOR POSITION IN COMPUTATIONAL FLUID DYNAMICS

The Basque Centre for Applied Mathematics (BCAM), together with IKERBASQUE invites applications for one Research Professor position in COMPUTATIONAL FLUID DYNAMICS. This Research Professor call offers a permanent contract position for experienced researchers.

We are looking for candidates with Knowledge and master of the following techniques:

- Computational Fluid Dynamics
- Finite element and finite volume methods, 3D design, mesh generation and adaptivity
- Numerical methods for Partial Differential Equations.
- Optimization
- Programming experience and knowledge on parallel computing
- Industry and real applications

Applicants must have a PhD in Mathematics, Physics, Engineering or Scientific Computing.

The candidates are expected to be outstanding scholars with a proven record of achievements and demonstrated potential to lead and sustain an ambitious research program in Computational Fluid Dynamics. The selected candidate will be in charge of leading the Research Line “CFD Modelling and Simulation” and promoting new research projects in the field of CFD. The successful candidate should build internal and external collaborations and promote knowledge transfer. Experience on projects applied to advanced manufacturing (such as metal powder feeding systems for laser cladding technology or turbomachinery) and marine energy (such as wave energy converters) would be considered a plus.

The Basque Centre for Applied Mathematics (BCAM) established in Bilbao is a world-class research centre on Applied Mathematics with a focus on interdisciplinary research in the frontiers of mathematics, attraction and training of talented scientists, development of new numerical and simulation methods, interaction with industry, and promotion of scientific and technological advances worldwide.

Aiming to strengthen the Basque Science and Technology System, BCAM was created in September 2008 by the Basque Government through Ikerbasque, the Basque Foundation for Science. BCAM obtained the Severo Ochoa Centre of Excellence award in 2013, by the Spanish Ministry of Economy and Competitiveness (MINECO).

Located in the Basque Country, it benefits from a long industrial tradition, and it is linked with the French Atlantic corridor, a region of excellence in Applied Mathematics. This context contributes to the task of building an excellence research centre. BCAM counts with around 70 researchers from over 20 different countries with experience in some of the most prestigious research centres on their area, organized in 5 research areas. There are excellent administrative and technical support staff and research personnel (PhD and postdoctoral students). The senior positions are permanent appointments.

BCAM is a young research centre that is facing its consolidation phase. In this sense, the scientific strategy of the Centre is based on three Scientific Platforms that have been set up in order to establish an interdisciplinary system capable of facing the challenges of Mathematical Science in a broad manner by bringing together Mathematics, Engineering and Sciences:

- Core in Applied Mathematics: PDE, Numerical Analysis, Fourier Analysis, Algebraic Geometry, Probability and Statistics.
- Computational Mathematics: Modeling and computer simulations using numerical, stochastic and Monte Carlo methods.
- Applications of Mathematics to Industry, Social Sciences and Health Sciences.

Candidates should provide:

- CV
- Letter of interest, including your research interest.
- 2 recommendation letters (additional references may be requested during the evaluation)
- Statement of past experience (2-3 pages). Please, highlight your main results.

Only researchers with a strong record of research will be considered. Women candidates are especially welcome.

Applicants should be fluent in English. Knowledge of Spanish and/or Basque will be considered useful but is not compulsory.

For more information, please contact recruitment@bcamath.org

All applicants are invited to submit their application on-line at:

<http://www.bcamath.org/en/research/job>.

We encourage immediate applications as the selection process will be ongoing.
